EDUCATION

University of Minnesota

Studying Computer Science & Management Information Systems **GPA: 3.68**

Minneapolis, MN

Sep. 2021 – Dec. 2025

EXPERIENCE

Associate Software Engineer I

Minneapolis, MN

Aspen Technology

Jan. 2026 – Present

- * Develop backend functionality primarily in **Java** for a large enterprise web application serving **5,000+ customers**, integrating modern capabilities into a **legacy production codebase**.
- * Designed and implemented a **Java-based workflow processing system**, reducing workflow states from **5 to 3** and migrating **10,000+ existing jobs** by mapping legacy workflow data to a new state model and introducing **workflow IDs stored in MongoDB**.
- * Built a **MongoDB version detection and upgrade utility** that automatically applies required **database schema updates** during application upgrades.
- * Refactored legacy **singleton-based MongoDB access patterns** across **20+ Java classes** into a structured service layer that retrieves collections and converts them into typed **Java POJOs**; updated associated **unit tests** to support the new workflow state model.
- * Partnered with **QA engineers, product managers, and developers** to translate feature requirements into technical designs, coordinate testing strategies, and ensure reliable delivery of customer-facing functionality in an **Agile development environment**.
- * Identified a customer usability gap and proposed a **TypeScript** front-end enhancement introducing a **clipboard copy component** for file paths, improving accessibility and streamlining workflows for technical users.

Software Engineer Intern

Minneapolis, MN

Ameriprise Financial

June 2025 – Aug 2025

- * Developed **10+ dynamic form features** using **JavaScript**, reducing average client input time by **15%**.
- * Resolved **12+ complex validation bugs** to prevent data loss and ensure consistency across modules.
- * Optimized server-side queries and database access, reducing execution time by **20%** for **5,000+ active users**.

Software Engineer Intern

Minneapolis, MN

Accenture

June 2024 – Aug 2024

- * Built full-stack workflow tools using **JavaScript, Express.js, MongoDB** to automate manual approval processes.
- * Improved rule-based backend logic, reducing operational errors by **50%** and increasing processing efficiency.

CSCI Teaching Assistant

Minneapolis, MN

University of Minnesota

Jan. 2024 – December 2025

- * Led **20+ lab sessions** for **750+ students**, explaining recursion, OOP, and algorithm analysis.
- * Assisted faculty in debugging student projects and refining course materials to improve instructional outcomes.

PROJECTS

Interactive Minneapolis Skyway Map

JavaScript, MongoDB, HTML, CSS, Express.js, Node.js, Git

- * Built an interactive skyway map using **JavaScript, Leaflet.js, HTML/CSS**, enabling clear route visualization across connected buildings.
- * Implemented **REST APIs with Express.js** and optimized **MongoDB queries** for faster data retrieval.
- * Integrated backend APIs with frontend components, ensuring seamless user interaction and accessibility.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, C, OCaml, HTML, CSS, SQL, C

Frameworks: React, Express.js, .NET Framework, Angular

Libraries / Testing: React, Next.js, Express.js, Tailwind CSS, pandas, NumPy, JUnit, DevExpress, DevExtreme

Databases: MongoDB, MySQL, MongoDB

Developer Tools: Git, Docker, VS Code, IntelliJ, Postman, Linux Command Line, Node.js, Vercel, Swagger
